# INFORMATION MANAGEMENT

2023

# GOLDEN THREAD

1. Accurate and trusted
2. Residents feeling secure in their homes
3. Culture change
4. Single source of truth
5. Secure
6. Accountable
7. Understandable / consistent
8. Simple to access
9. Longevity / durability and shareability of information
10. Relevant / proportionate

BS 8644-1:2022

BSI Standards Publication

## Digital management of fire safety information

Part 1: Design, construction, handover, asset management and emergency response – Code of practice

BS 8644 is expected to be published in the following parts:

- Part 1: Design, construction, handover, asset management and emergency response – Code of practice;
  - Part 2: Development and use of fire strategies – Code of practice.
- a) Provide a safer built environment that is appropriate for the intended end users;
  - b) Reduce disruption to business operations and property loss from fire; and
  - c) Enable relevant, accurate and accessible fire safety information to be made available to the right people at the right time.

# FIREIE IS NOT COBIE – MAINTAINABLE ASSETS

- Cavity Barriers
- Door Intumescent Strips
- Fire Collars
- Penetration Foam fills
- External Insulation

# ISO 19650 PRINCIPALS

b) BS EN ISO 19650-1:2019, Figure 1

## NA.2 Information container identification (ID)

### NA.2.1 Clarification

ISO 19650-2:2018 [5.1.7.a] states: "The project's common data environment shall enable each information container to have a unique ID, based upon an agreed and documented convention [comprising] fields separated by a delimiter".

### NA.2.2 Information containers

In the UK, the unique ID for project file information containers within a common data environment (CDE) should be defined using all the fields shown in Figure NA.1 in the order shown, coded according to NA.3, separated by a delimiter and used in its entirety as a single unique string.

Field codes within the file information container ID should be formed using only alphanumeric characters (capital and lower-case letters A-Z and digits 0-9).

The convention for naming CAD layers is documented in BS EN ISO 13567-2.

# UK BIM FRAMEWORK

bsi. cdbb UKBIM ALLIANCE

## How the UK BIM Framework will help your business

### The UK BIM Framework is...

an overarching approach that helps you to implement information management successfully into your business.

The Construction Playbook was created to ensure that we change our approach to delivery and asset operation. It recommends using the UK BIM Framework to align with the correct standards as well as having the right tools and guidance to make this a reality.

Begin implementing better information management into your organisation, with the guidance and support of the UK BIM Framework.

[UKBIMFramework.org](http://UKBIMFramework.org)

### Key benefits:

Helps owners and operators achieve their business objectives and reduce the risks and costs through effective, secure and efficient production, use, and management of information

### Reference:

# OCULO

WORKING TOWARDS A NEW WAY OF  
DOCUMENTING AND MONITORING SITE WORK

SYMETRI

# FEATURES - FLOORPLAN NAVIGATION

Navigate within a scene using the arrow buttons

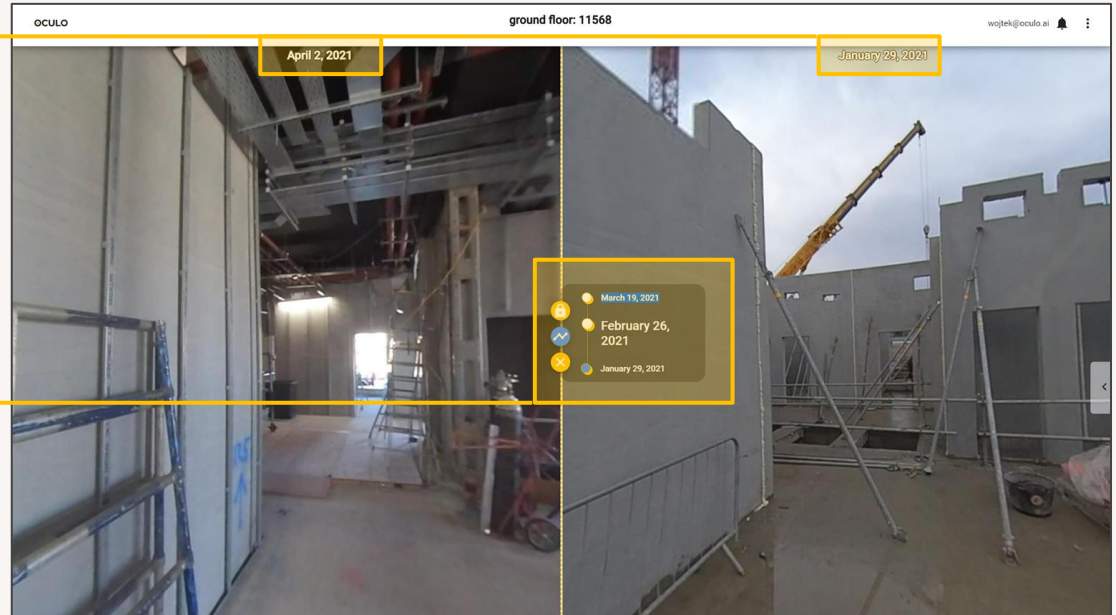

Each of the points on the plan connect to an up to date 360° site view, and can be used to teleport between scenes using the Floorplan View or the MiniMap

# FEATURES - SIDE BY SIDE VIEW

Scenes viewed in Side by Side are time stamped according to the scan date

Travel through time by selecting the scan date from the Scan Timeline

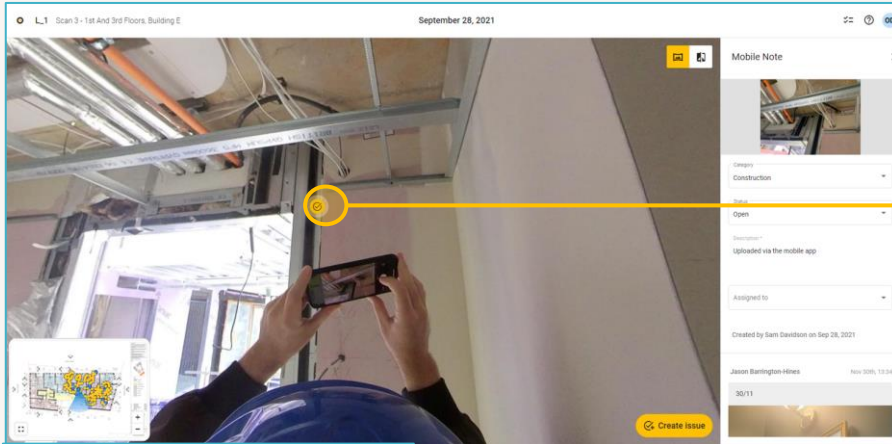

# FEATURES - BIM SIDE BY SIDE VIEW

One click connection to BIM model for any scene in the Virtual Jobwalk, with synchronised navigation within the 360° frame

Maintain all the functionality from your BIM toolkit

# FEATURES - AUTOMATICALLY PIN DETAILED PHOTOS

Photos captured via the Oculo Mobile App during a job walk are automatically pinned to the location at which they were taken

Using mobile cameras allows the capture of high resolution images only where required, such as asset tags, without sacrificing scan time or causing a significant increase in hardware costs
